KRISTY BAYLEY

Director of Operations

"I'm motivated to improve communities around the world through sustainability and education. That's why I call Switch Automation home."

Kristy is the Director of Operations for the global Switch Automation business.

She brings extensive management experience within the property sector to run all of the operations, admin, finance and HR for our five offices, four companies and more than 38 staff. Kristy also helped develop rich partnerships with tech giants—Microsoft, Intel and Dell.

Kristy is most proud of...

> Overseeing the day-to-day activities of our five offices, in the U.S, Australia, The Philippines and Ukraine.

> Learning the various financial / tax systems needed to keep our multiple offices functioning legally and profitably.

> Bringing Switch Automation to the U.S. market from our headquarters in Sydney—launching an office, onboarding the business team, managing the legal and financial implications and most of all, helping to secure our first U.S. customers, advocates and partners.

When Kristy isn't busy being our Director of Operations, you can find her...

> Running around bases & chasing fly balls in the softball outfield
> Frolicking in the surf, trying to catch a wave
> Watching sport with a side of trivial banter with mates

8
years in building industry

Certificate IV in Property

Certificate IV in Hospitality
